

# Davide Mark Sardella

Full Stack Developer

davidemark.1993@gmail.com | +39 380 1868847 |  | 

## Summary

Full Stack Developer with 2+ years of experience building, maintaining, and evolving web applications and microservices using Java, Spring Boot, Node.js, and React. Skilled in both frontend and backend development, CI/CD with Jenkins, and server configuration (Apache, Tomcat). Involved in incident management and ticket resolution. Adept at problem solving and thriving under pressure. Currently acting as SCRUM Master, facilitating agile delivery within the team. Passionate about clean code and performance.

## Experience

### Full Stack Developer — Betacom (Consultant at Intesa, a Kyndryl Company)

2023 – Present

- Serving as SCRUM Master, facilitating sprint planning, stand-ups, and retrospectives to ensure agile delivery.
- Designed and maintained CI/CD pipelines using Jenkins for automated microservices deployment.
- Configured Apache HTTP servers and Tomcat application servers for deployment and routing of backend services.
- Developed new features and enhancements (evolutive maintenance) for existing products and microservices.
- Handled incident and service request tickets, ensuring timely resolution and minimal downtime.
- Participated in DevOps activities within the development team, including deployment and monitoring processes.
- Demonstrated strong problem-solving skills and ability to remain effective under high-pressure environments.
- Worked on backend APIs using Java (Spring Boot) and built frontend components with React.

## Education

### Academy Full Stack / DevOps

Betacom, 2023

### Academy Full Stack Web Developer

Aulab, 2022

### B.Sc. in Mechanical Engineering

Politecnico di Torino, 2018

## Skills

Apache / Nginx / Tomcat	React	Java / Spring Boot	Node.js / Express / pm2	Elasticsearch / Kibana
Git / Gitlab / GitHub	Docker / Podman	CI/CD / Jenkins	Agile / SCRUM	Linux

## Soft Skills

Problem Solving	Stress Management	Team Leadership	Agile Communication	Responsibility and Ownership
-----------------	-------------------	-----------------	---------------------	------------------------------

## Languages

Italian: Native	English: B1
-----------------	-------------

## Personal Projects

Developed personal web applications using Node.js and Express in my spare time.	Configured Raspberry Pi devices as lightweight home servers to host local apps and dashboards.	Experimented with automation, system monitoring, and self-hosted services on Linux-based environments.
